Dear Owner or Manager,

My name is Oussama Nekker. I am a web developer based in Essaouira, and I have worked inside hospitality at the front desk and during night audit. That matters because I have seen the small problems a website should prevent: a guest cannot find room details, the map is unclear, the WhatsApp number is buried, or the same question gets answered again and again.

I build websites for riads, hotels, guesthouses, restaurants, and tour businesses that want clearer guest communication and more direct inquiries.

WHAT I CAN HELP WITH

- A new website or a redesign of a current site that is slow, unclear, or outdated.
- Mobile-first room, service, restaurant, or tour pages for travelers browsing on phones.
- English, French, and Arabic content structure, including Arabic RTL pages when needed.
- Direct contact flow: WhatsApp, phone, email, Google Maps, inquiry form, and booking request in the right places.
- Rooms, menus, tours, photo galleries, services, reviews, FAQs, and practical guest information.
- Maintenance, updates, and small improvements after launch.

WHY THIS MATTERS

- Many guests decide from a phone before they ever call or send a message.
- A clear site reduces repeated questions about rooms, prices, location, arrival, and services.
- Multilingual pages help international guests understand the offer without guessing.
- A direct inquiry path gives you another channel besides booking platforms and social media.

SIMPLE NEXT STEP

If you are hiring, I am available for hospitality/digital support roles. If you are not hiring, I can still help as a freelance website builder. Send me your current website and I will suggest 3 practical improvements for free.

You can reply by email or WhatsApp. I am available for a short call or an in-person meeting in Essaouira.

Best regards,

Oussama Nekker
